PROJECTS

ToDo-SpringBoot|MySQL

- Developed a ToDo application using Spring Boot and MySQL to manage tasks and to-do items efficiently. The application allows users to create, read, update, and delete tasks through a user-friendly web interface.
- Configured the MySQL database in the application.properties file to store task information securely.
- Utilized Spring Data JPA to create a repository interface for seamless CRUD operations on the tasks.
- Deployed the application to a local server for testing and employed best practices, such as input validation and error handling, to enhance the application's reliability and security.

PortfolioWebsite-HTML|CSS|Js

- Designed and developed a personal Portfolio Website using HTML, CSS, and JavaScript to showcase my skills, projects, and achievements. The website serves as an interactive and visually appealing platform to present my professional profile to potential employers and clients.
- Created a responsive and mobile-friendly website layout using HTML5 and CSS3, ensuring optimal user experience across different devices and screen sizes.
- Implemented custom CSS styles and animations to enhance visual appeal and showcase creativity in design. Utilized JavaScript to add interactive elements and dynamic functionality, such as smooth scrolling, navigation bars, and filtering projects by category.
- Tested the website across different browsers to ensure cross-browser compatibility and smooth functionality.
